(PDF) Human Sexuality

Sexual reproduction is a type of reproduction that involves a complex life cycle in which a gamete (such as a sperm or egg cell) with a single set of chromosomes combines with another to produce an organism composed of cells with two sets of chromosomes (). Sexual reproduction is the most common life cycle in multicellular eukaryotes, such as animals, fungi and plants.

A germ cell is any biological cell that gives rise to the gametes of an organism that reproduces sexually. In many animals, the germ cells originate in the primitive streak and migrate via the gut of an embryo to the developing gonads. There, they undergo meiosis, followed by cellular differentiation into mature gametes, either eggs or sperm. ...
