### Infectious Myositis Treatment & Management: Medical Care ...

Polymyositis is an idiopathic inflammatory myopathy that causes symmetrical, proximal muscle weakness; elevated skeletal muscle enzyme levels; and characteristic electromyography (EMG) and muscle biopsy findings (see the images below). Clinically similar to polymyositis, dermatomyositis is an idiopathic, inflammatory myopathy associated with ...

### Polymyositis: Practice Essentials, Etiology, Epidemiology

Autoimmune myositis should be suspected in patients with proximal muscle weakness with or without muscle tenderness. Dermatomyositis should be suspected in patients with symptoms of myositis and skin findings compatible with dermatomyositis. Establishing the diagnosis of autoimmune myositis requires as many as possible of the following 5 criteria:

### Autoimmune Myositis - Merck Manuals Professional Edition

Health Guide: Medication List: What is Myositis? Myositis is the medical term for muscle inflammation. In myositis, inflammation damages the fibers of a muscle. This causes muscles to be weak by interfering with the ability of the muscles to contract. Although myositis can cause muscle aches and muscle tenderness, weakness is usually the dominant symptom.
