Vitamin D | ScienceDirect

Vitamin D 2 as a concentrate or in microcrystalline forms is used in many pharmaceutical preparations, although vitamin D 3 is preferred by many manufacturers and consumers because it is the form occurring naturally in animals. Vitamin D 2 has been used as a feed supplement for cattle, swine, and dogs, but its use has declined in favor of vitamin D 3. As far as storage and shipping is concerned, Vitamin D is sensitive to air, heat, UV light, and mineral acids.
